

Midas DESIGN+ 2021 v3.2 (actualización noviembre 2021)

1. [Moment Bolt Connection] Supports import function of slope-type structure
2. [Moment Bolt Connection] Correction of an member list results output & Libxl report output error

Midas DESIGN+ 2021 v3.1 (comercial octubre 2021)

1. Add Composite Beam Design as per Eurocode
2. Design report generation by user defined unit

Midas DESIGN+ 2021 v2.1 (comercial junio 2021)

1. User define of Deck Plate of composite beam module

Midas DESIGN+ 2021 v1.3 (actualización abril 2021)

1. Correction of an error that the anchor length was not reflected according to the material
2. [EC2 RC Column] Correction of an error in which the direction of the column was calculated in the opposite direction when calculating the minimum eccentricity

Midas DESIGN+ 2021 v1.2 (actualización marzo 2021)

1. [Rebar Option] The rebar diameter change is applied according to the design criteria.
2. [Reinforcement RC Beam] The reinforcement module of beam is presented in shear reinforcement details

Midas DESIGN+ 2020 v2.3 (comercial septiembre 2020)

This patch has fixed the following errors found in **Design+ 2020(v2.2)**, **Build date: May. 22, 2020**

1. There was an error when checking the thickness limit in the aluminum design.
2. The minimum rebar ratio (ρ_{min}) was not applied when SRC column was subjected to the tensile force.
3. In the strip footing design according to EC2:2004, there was an error in calculating MEd and VEd per unit width.
4. There was an error in the application of the strength reduction factor when calculating the flexural strength according to AISC-ASD05.

5. Steel design as per EN/EN 05 has been improved to apply different material strengths depending on the thickness of steel component. (New)

6. 'Period Lock' system has been introduced for license check. (New)

Midas DESIGN+ 2020 v1.1 (comercial agosto 2019)

1. Unión Atornillada según AISC

Midas DESIGN+ 2019 v2.1 (comercial Enero 2019)

1. Nuevo Dimensionamiento de Acero según AISC360-16 y AISC360-16M

Midas DESIGN+ 2019 v1.1 (actualización Septiembre 2018)

1. Solucionado error de importación de archivos CAD

Midas DESIGN+ 2019 v1.1 (comercial Julio 2018)

1. Pilares de Sección Mixta según AISC-LRFD 10M

2. Pilares CFT según AISC-LRFD 10M

3. Hormigón reforzado con Fibras

4. Pilares/Vigas de Aluminio según ADM

5. Mejora de Rigidizadores para Placas de Anclaje
